

BulkChange.IT for ACT!

Change multiple fields in one easy process in ACT! 2007, 2008 or 2009

Highlights:

- Perform bulk changes to the contents of any opportunity field (ACT! Only allows you to change contact fields)
- Work with the current lookup or the entire database
- Conduct multiple changes in a single process
- Define the hierarchy of your selected changes
- Easily set up changes using a simple interface based on "if...then" conditional logic
- Change one field based on the value of another

avoid the hassle of updating Opportunity fields one entry at a time
