

Table.IT for ACT!

Attach and manage your own tables in ACT! 2008 and 2009

Highlights:

- Build custom tables and define relationships between contacts, companies and groups in ACT!
- Create an unlimited number of tables
- Manage the information you need to suit your business demands
- Search within tables and filter results for superior look up precision
- Choose whether a custom table may be accessed by all users or just the table creator
- Combine with other AddOns for additional layers of functionality

Import.IT – import and merge data into your custom tables

Export.IT – export table data in many formats (HTML, mht, PDF, txt, xls, RTF)
