

It is difficult enough to work together with foreign partners, customers or colleagues, so at least the handling of the ACT! user interface should be easy. ACT! Translator is a great little helper. You have the option to change ACT!'s user interface language. Now sharing ACT! is very simple.

Why ACT! Translator?

- Sharing a database though your partners speak a different language.
- Supports ACT! 2011 (English), so you are always up-to-date.
- Synchronize the database with users, using another language.
- Immediate change of the ACT! user interface with just one click.
- Through the support of terminal servers each user can choose his individual language,
- Per-user licensing,
- The only way to work with ACT! in German, French, Dutch, Spanish, Italian, Russian, Polish or Thai.

Supported Languages

- German
- Dutch
- French
- Spanish
- Italian
- Russian
- Polish
- Thai
