

Making changes in only one step? Every ACT! user knows changing of field content is an arduous and time consuming exercise. ACT! only allows you to change the fields of contact and group fields, but what if you have to change a sales opportunity field in different entries? **BulkChangeIT** helps! It allows you to do mass changes for opportunities at update several data fields at the same time. You decide on the sequence of such changes. This not only saves time, it also increases the accuracy of information.

Ändern und Kopieren Sie Verkaufschancen durch Definition einer Bedingung, z. B. mit der "wenn, dann"-Logik. Es sind aber auch vielschichtigere Bedingungen bestimmbar. Simple changes like the "if-then" condition are possible as well as more advanced structures.

## Summary of the highlights in BulkchangeIT

- Making mass changes in the contents of the sales opportunity fields (ACT! only allows you to change the contactbox)
- Update of several data fields at the same time
- Work with the actually sales opportunity or with the whole database.
- Define the sequence of your chosen changes.
- Changing and copying the sales opportunities by defining a condition, for example the „if-then“-logic. There is also the determination of complex conditions possible.
- Copying the sales opportunities fields
- System requirement: ACT! 2010 (ACT! 12) and above
